## INTENSIVE REJUVENATION

Blue Retinol | Peptides | ATP – Stim | Hyaluronic Acid

## ABSOLUTE REJUVENATION, REGENERATION AND HYDRATION CODE

Comprehensive, in-depth repair program - regeneration and hydration for all types of damaged skin with signs of ageing and wrinkles, for sagging, mature and tired skin without energy and with unhealthy skin tone. This line is based on modern biotechnological and plant ingredients inspired by research in genetic skin ageing and focussed on increasing cell energy (ATP) and restoring proper regeneration mechanisms. Hyaluronic acid, blue retinol of plant origin, advanced peptides slowing down the cell ageing process and filling the wrinkles "from the inside" as well as numerous anti-ageing formulas ensure spectacular skin rejuvenation effects.

### NUTRI MAXX ACTIVE FORMULA

**BLUE RETINOL** plant retinol, an equivalent of endemic algae, rich in proteins, lipids, saccharides and vitamins, stimulates keratinisation and renewal processes, smoothes and improves skin tone.

**MATRIXYL 3-Peptide** strong anti-aging, low molecular weight peptide, stimulates the synthesis of main components of the dermal matrix and the dermo-epidermal junction, including type I, III, IV collagen and hyaluronic acid. Improves skin hydration, density, firmness and elasticity, tone and face oval. The effectiveness is confirmed by the in vivo panel study on a cohort of 25 women aged 42 -70 years.

**HYA-STIM 3-Peptide** stimulator of the hyaluronic acid synthesis - next-generation tripeptide refirms skin and produces a "from the inside" wrinkle smoothing effect, shapes face oval.

**ATP-STIM** modern component stimulating and increasing cellular energy, protects skin and reduces signs of fatigue, improves vitality.

**HYALURONIC ACID** with different particle sizes, from ultra-low molecular weight 5 kDa (ULMW) to a high molecular 1 MDa, thanks to which it penetrates into various types skin levels, deeply hydrating it and creating a protective occlusive layer.

**RED CORAL ALGAE (Corallina Officinalis)**; an extract rich in magnesium and calcium, which contribute to the maintenance of the skin's hydro-lipid balance, improve its elasticity and hydration. They also have antioxidant and antibacterial properties.
