CURE - REPAIRING DERMOTHERAPY
WITH PLATINUM, SODIUM DNA AND NEUROPEPTIDE

THE STRENGTH OF PLATINUM

PHOTODYNAMIC METHOD LASER PDT/LED R 650nm or UV 420nm

Exclusive PLATINUM product line combines the properties of **PDT PHOTODYNAMIC CHEMICAL BLEND-PEELS**, which contain acids and innovative active ingredients, with the advanced **REBUILDING DERMOTHERAPY**. The force of the PLATINUM PEEL & CURE is a fusion of selected acids, nano-platinum, Sodium DNA and sea anemone toxin like neuropeptide.

Photodynamic peels are based on the synergy of LASER LLLT or LED light and organic acids with photosensitive substances. The therapeutic effect is particularly visible in the area of keratinocytes and fibroblasts, while the light energy absorbed into mitochondria boosts cellular energy and activates the synthesis of nucleic acids. The dermotherapy is based on the stimulation of cellular metabolism, which enables activating cell receptors – this leaves the skin rejuvenated and produces a therapeutic effect on skin problems.

The combination of the strong biotechnological and photo-biotechnological properties ensures **spectacular therapeutic effects**:

- **CUMMULATIVE STRENGTH OF DIFFERENT ACIDS** at the **PEEL** stage – the effect of their action is cumulative, amplified and complementary – their action is deeper and stronger.
- **PHOTOBIOCHEMICAL ENHANCEMENT** – treatment products contain innovative formulas including CHANTARELLE photosensitive bio-chromophores (R 650nm and UV 420nm), which – in combination with the photodynamic method PDT LASER / LED – activate photo-biochemical reactions in the skin, thus accelerating the repairing processes.
- **REBUILDING, REJUVENATION** and **CELLULAR RENEWAL** at the **CURE** stage – innovative active ingredients SODIUM DNA and bio-mimetic SEA ANEMONE TOXIN LIKE NEUROPEPTIDE – accelerate skin repair processes and reduce irritations after intensive exfoliating treatments.
- **ADVANCED PROTECTION** – strong antioxidant properties and high SPF 50 UVA/UVB/IR protection against the effects of photo-ageing and aggressive external irritants (free radicals, stress, smog, urban air pollution).

PLATINUM PEEL & CURE TREATMENT SCHEME

1. Remove make-up of the treated skin using SPECIAL AESTHETICS products.
2. Cleanse and remove oil from the treated skin using **PLATINUM PRE-PEEL FOAM 18% pH 4.5**.
3. Apply a **PDT PHOTODYNAMIC PLATINUM BLEND PEEL*** dedicated to the skin problem for up to 5 minutes using **PDT LASER** or **LED** (R 650nm and UV 420nm) photodynamic method or manually. In cases of severe redness, immediately rinse off with water!
4. Rinse the skin with water and dry it. Neutralise the skin using **PLATINUM NEUTRALIZER**.
5. **PDT PHOTODYNAMIC PLATINUM ULTRA CURE COMPRESS-MASK LASER LED R/UV** - apply for 15 mins using the **PDT LASER** or **LED** (R 650nm and UV 420nm) photodynamic method or no-needle mesotherapy or sonophoresis or manually. We recommend using the **PDT MASTER® Magneto-LED-LASER** device in combination with **Photodynamic Platinum Massage CHANTARELLE**. If you apply the Compress-Mask manually, apply it onto the skin for 15 mins and gently massage over a short period of time.
6. Apply a **PLATINUM ULTRA CARE AND PROTECTION DAY CREAM SPF50 UVA/UVB/IR** with a very high UV/IR filter.
7. Instruct the client to follow the **MANDATORY HOME CARE ROUTINE** comprising:
 - **PLATINUM ULTRA CARE AND PROTECTION DAY CREAM SPF50 UVA/UVB/IR,**
 - **PLATINUM ULTRA CURE FACE AND EYE COMPRESS-CREAM,**
 - Tell the client not to sun-bathe or use tanning beds for at least 30 days after the treatment cycle as well as between the treatment sessions.

TREATMENT FREQUENCY:
4 treatments in a series, every 10-14 days or as a single treatment. Thanks to the multi-targeted PEEL & CURE action, the effects are visible already after the first treatment.

TREATMENT DURATION:
up to 40 mins.

*SELECT A PDT PHOTODYNAMIC BLEND-PEEL (LASER/LED) INDIVIDUALLY TAILORED TO THE SKIN NEEDS

SODIUM DNA
strong rejuvenation and wrinkle reduction at the same time

BEFORE the treatment

AFTER the treatment

PDT Photodynamic Platinum Blended Peel Melaner 46% pH 3.0 – dedicated for skin with discolourations and spots of various etiologies, acneic, flabby, impure skin requiring rejuvenation and reconditioning.

PDT Photodynamic Platinum Blended Peel Retinologic 45% pH 3.0 – dedicated for combination skin, oily, acneic, with open pores, topically dehydrated, requiring purification and normalisation.

PDT Photodynamic Platinum Blended Peel Sensiter 45.5% pH 3.2 – dedicated for thin, delicate, vascular and sensitive skin requiring strengthening and regeneration.

PDT Photodynamic Platinum Blended Peel Age Clinic 52% pH 3.2 – dedicated for dry, mature, poorly elasticised and wrinkled skin requiring moisturisation and lifting.

IMPORTANT:

- Make sure that the probe of the LASER or LED device is protected when applying BLEND-PEELS – use the separator or protective sheath.
- The total application time when you use the laser method may not exceed 30 minutes.

MAIN CONTRAINDICATIONS FOR CHEMICAL PEEL TREATMENTS

active vascular neuroses, allergy to the specific exfoliant, spots and birthmarks of unusual forms require dermatologist advice, severe acne, wounds, active herpes, viral and bacterial skin infections, pustules, if you underwent cryotherapy and retinoid therapy – wait at least 6 months, fungal skin infections, warts, numerous pigmentation changes, skin tumours, propensity to scar, tanning dependence (tanorexia), pregnancy and breastfeeding, if you underwent surgical treatments – wait at least 6 months.

MOST IMPORTANT CONTRAINDICATIONS FOR PHOTODYNAMIC PDT TREATMENTS

ABSOLUTE: pregnancy, electronic implants, tumour, tuberculosis, viral, bacterial and fungal infections, acute skin inflammation and undiagnosed skin lesions, photo allergy and drug-induced photo-sensitivity.

RELATIVE CONTRAINDICATIONS SUBJECT TO MEDICAL ADVICE: overactive thyroid, diabetes, unbalanced hypertension, vascular diseases, other chronic illnesses (e.g. lupus, porphyria, epilepsy).

PLATINUM PEEL & CURE

PROFESSIONAL TREATMENT & HOME CARE PRODUCTS

PROFESSIONAL TREATMENT & HOME CARE PRODUCTS

PLATINUM PEEL & CURE

PLATINUM Platinum Pre-Peel Foam 18% pH 4.5

For every skin type. Effectively cleanses and removes skin oil, moisturises and regenerates, has antioxidant, anti-inflammatory and anti-bacterial properties; CP0550 200ml

rejuvenating platinum,
mandelic acid,
lactobionic acid,
gluconolactone

PLATINUM PDT Photodynamic Platinum Blended Peel Melaner 46% pH 3.0 LASER LED R/UV

for skin with discolourations and spots of various etiologies, acneic, flabby, impure skin requiring rejuvenation and reconditioning; CP055150 50ml

rejuvenating platinum,
lactic acid, citric acid, kojic acid,
salicylic acid,
depigmenting Bio-Hydroquinone,
bearberry extract (arbutin)

PLATINUM PDT Photodynamic Platinum Blended Peel Retinologic 45% pH 3.0 LASER LED R/UV

for combination skin, oily, acneic, with open pores, topically dehydrated, requiring thorough cleansing and normalisation; CP055250 50ml

rejuvenating platinum, pure retinol,
mandelic acid, citric acid, phytic acid,
salicylic acid, azelogyline,
bearberry extract (arbutin), licorice

PLATINUM PDT Photodynamic Platinum Blended Peel Sensiter 45,5% pH 3.2 LASER LED R/UV

for thin, delicate, vascular and sensitive skin requiring strengthening and regeneration; CP055350 50ml

rejuvenating platinum, gluconolactone,
lactic acid, shikimic acid, azelogyline,
high-molecular weight hyaluronic acid,
sea-buckthorn extract,
rock samphire extract

PLATINUM PDT Photodynamic Platinum Blended Peel Age Clinic 52% pH 3.2 LASER LED R/UV

for dry, mature, poorly elasticised and wrinkled skin requiring moisturisation and lifting; CP055450 50ml

rejuvenating platinum, glycolic acid,
lactic acid, citric acid, mandelic acid,
extracts of hop, rosemary, sage, hamamelis,
horsetail, lemon, pennywort, pine

PLATINUM Platinum Neutraliser

for laser acids from the PLATINUM line. It contains ingredients with moisturizing, anti-inflammatory, repairing TEWL and skin barrier functions; CP0555 200ml

rejuvenating platinum,
hyaluronic acid large and low
and ultra-low molecular weight,
extracts of algae red carrageen moss,
calendula, aloe juice

PLATINUM PDT Photodynamic Platinum Ultra Cure Compress-Mask LASER LED R/UV

intensively regenerates and soothes, for every skin type, especially recommended for advanced rejuvenation, after chemical peels and equipment-based aesthetic treatments.

Application: PDT LASER LED R/UV, no-needle mesotherapy, sonophoresis, also for Photodynamic Platinum Massage CHANTARELLE; CP0856 200ml

rejuvenating platinum,
repair Sodium DNA,
Anemone Neuropeptide - a soothing neuropeptide
about the action of the venom of sea anemone,
high-molecular weight hyaluronic acid,
allantoin, macadamia oil, shea butter,
beeswax

PLATINUM Platinum Ultra Cure & Protect Day Cream SPF50 UVA/UVB/IR

with very high UV and IR protection; for every skin type; especially recommended for advanced rejuvenation, after chemical peels and equipment-based aesthetic treatments; CD1466 50ml

rejuvenating platinum,
repair Sodium DNA,
Allantoin VC - vitamin C complex with allantoin,
vitamin E, Shea butter, beeswax,
Infra-Renover DNA - special protection
antioxidant stable,
very high UVA/UVB filters

PLATINUM Platinum Ultra Cure Anti-Ageing Night Compress-Cream Face and Eyes

regenerates and soothes; for every skin type, especially recommended for advanced rejuvenation, after chemical peels and equipment-based aesthetic treatments; CD1467 50ml

rejuvenating platinum,
repair Sodium DNA,
Anemone Neuropeptide - a soothing neuropeptide
about the action of the venom of sea anemone,
Allantoin VC - vitamin C complex with allantoin,
vitamin E, Shea butter, beeswax

PLATINUM PDT Photodynamic Platinum Massage Gel LASER LED R/UV

for the CHANTARELLE Photodynamic Platinum Massage.

Application: PDT LASER LED R / UV or manually;
CP1783 500ml

rejuvenating platinum,
high-molecular weight hyaluronic acid,
horse chestnut extract, rosehip oil,
corn oil, avocado oil,
vitamins A, E, H, B₅, inositol

PLATINUM PEEL & CURE ACTIVE INGREDIENTS

NANO-PLATINUM

Platinum nanoparticles are obtained from super-pure 4N-class platinum, which guarantees that there are no metal ions in the colloid. Has strongly rejuvenating, regenerating and rebuilding properties. Reduces malformations in skin cells, participates in restructuring the tissue (healing, cicatrisation). Radically reduces discolourations, has strong anti-septic and anti-bacterial properties.

SODIUM DNA

Intensively rejuvenates and regenerates the skin, has also moisturising, photo-protective and anti-oxidant properties. Stimulates natural epidermal repair mechanisms. Reduces inflammations and skin micro-damage. In effect, reduces the existing wrinkles and prevents the formation of new ones.

ANEMONE Neuropeptide

Gentle sea anemones have a powerful weapon – the toxin that protects them from predators. The modern science and technology enabled creating a bio-mimetic pentapeptide based on the protein of the sea anemone toxin. The bio-mimetic pentapeptide blocks the TRPV1 pain receptors. It soothes over-reactive skin and minimises its reaction to stress and external irritants. Reduces symptoms of sensitive and irritated skin.

RETINOL (VITAMIN A 33,000 IU/g)

Stable and gradually released form. Plays a vital role in the RNA synthesis which forms new healthy cells. Normalises the functions of sebaceous glands and reduces acneic changes. Boosts firmness and elasticity by stimulating collagen synthesis, stimulates micro-circulation, reduces discolourations.

BIO-HYDROQUINONE

Whitens the skin with an effect comparable to hydroquinone, but without its harmful effects on the human body. Inhibits the melanogenesis process by significantly reducing the activity of tyrosinase; reduces the appearance of discolourations.

BEARBERRY EXTRACT (ARBUTIN)

Extract of the bear-berry plant inhibits melanogenesis by reducing the activity of tyrosinase, the enzyme responsible for melanin production and formation of discolourations.

AZELOGLYCINE®

Innovative combination of azelaic acid and glycine aminoacids with intensively moisturising, soothing and anti-inflammatory properties. Increases elasticity of supporting fibres.

ALLANTOIN VC

vitamin C complex with allantoin. It combines the whitening, antioxidant and anti-aging effects of vitamin C with the soothing and moisturizing effect of allantoin. It protects against free radicals and UV damage, reduces the effects of photoaging and skin aging.

HYALURONIC ACID

with different particle sizes, from ultra-low molecular weight 5 kDa (ULMW) to a high molecular 1 MDa, thanks to which it penetrates into various types skin levels, deeply hydrating it and creating a protective occlusive layer.

DNA INFRA-RENOVER

is a combination of Caesalpinia spinosa tannins and sunflower sprout extract. It ensures special antioxidant protection against infrared radiation IR, in particular IR-A and against blue light HEV. It protects mitochondrial DNA, stops the photoaging process, protects the skin from the effects of sun exposure and urban pollution.

ACTIVE FORMULA ENRICHED:

EXTRACTS OF RED ALGAE, CELLAR, CALENDULA, ROCK SAMPHIRE, LIQUORICE, HOP, ROSEMARY, SAGE, HAMAMELIS, HORSETAIL, LEMON, ASIATIC PENNYWORT, PINE, CHESTNUT, ALOE JUICE, WILD ROSE OIL, CORN OIL, MACADAMIA OIL, AVOCADO OIL, SHEA BUTTER, BEESWAX, VITAMINS A, E, H, B₅, INOSITOL

BIO-CHROMOFORY (R 650nm i 420nm)

For photodynamic treatments PDT LASER or LED:

R 650nm – energisation and regulation or UV 420nm – regeneration of irritated skin with inflammatory changes.
