LIFTING AND MODELLING OF SKIN STRUCTURES

Peptide | Phytic Acid | Herbal Extracts | Eye contour correction without a scalpel - 3 in 1 formula

INNOVATIVE LIFTING with THE LATEST GENERATION OF PEPTIDES in the PDT PHOTODYNAMIC, or MANUAL APPLICATION

Innovative Treatment line based on advanced formulas of the latest generation peptides - rejuvenating peptide of retinoic acid effectiveness, cyclo- and lipo-peptides with anti-ageing and skin architecture modelling properties. For all types of skin including flabby, inelastic and sensitive, mature skin with wrinkles.

Treatment can be carried out manually or using a special R light emitting device R (LASER or LED) with photodynamic PDT formulations (photosensitive) containing bio-chromophores, i.e. Lift R-Peel Phytic Acid 10% pH 5.0 and PDT Lift Peptide R-Concentrate 25% Gel Ampoule. Peptides are considered by anti-ageing medicine specialists as one of the most effective methods for repairing damaged skin functions and preventing ageing. Modern anti-ageing formulations stimulate synthesis of collagen, improve elasticity, texture and density of the skin and prevent skin from flabbing.

LIFT PEPTANGO R ACTIVE FORMULA

RETINO-PEPT next-generation peptide of clinically proven rejuvenating efficacy of retinoic acid without side effects. Stimulates the type I collagen synthesis and improves the cohesion and structure of the skin, enhances skin elasticity. Reduces wrinkles, brightens the skin tone and enhances face contour.

SYNPEPT 2-Peptide low molecular weight peptide complex with smoothing and anti-wrinkle properties, increasing skin elasticity. Strengthens the dermal-epidermal junction (DEJ) that maintains the cohesion of the dermis and epidermis, thus restoring firmness and elasticity. The main component of the DEJ are collagen fibers of type IV, VII, XVII and laminin V.

SYNVEL 3-Peptide - low molecular weight neuropeptide imitating the Temple Viper toxin - snake venom. It works on the same level as botulinum toxin and is a non-invasive alternative to surgical injection procedures. It smooths mimic wrinkles by inhibiting the vibrations of muscles of facial expression.

MATRIXYL 3-Peptide strong anti-aging, low molecular weight peptide, stimulates the synthesis of main components of the dermal matrix and the dermo-epidermal junction, including type I, III, IV collagen and hyaluronic acid. Improves skin hydration, density, firmness and elasticity, tone and face oval. The effectiveness is confirmed by the in vivo panel study on a cohort of 25 women aged 42 -70 years.

BEAUTIFEYE™ a super-innovative 3-in-1 formula, rejuvenating the area around the eyes with proven research results: 1. lifts the upper eyelid fold, 2. reduces the crow's feet at the corners of the eyes, 3. brightens dark circles under the eyes and decreases puffiness. Improves the contour of the eye, clearly reduces the appearance of fatigue.

FILMEXEL® - biomimetic natural glucopolymers from the Tara tree and red algae with film-forming and protective properties against external factors. It gives a natural lifting and smoothing effect, has anti-ageing properties.

LIPOS LIM is a combination of two high-purity plant molecules that together prevent fat accumulation. It significantly improves skin elasticity, smoothes unevenness, reduces swelling, and reduces the thickness and volume of the skin.

PHYTIC ACID with a unique structure ensuring gentle exfoliation of the epidermis, acceleration of cell renewal, restoration of the skin's natural glow. It has a keratolytic, illuminating and brightening effect. The acid is self-neutralizing (no neutralizer required).

RED CORAL ALGAE (Corallina Officinalis); an extract rich in magnesium and calcium, which contribute to the maintenance of the skin's hydro-lipid balance, improve its elasticity and hydration. They also have antioxidant and antibacterial properties.

ACTIVE FORMULA ENRICHED:

HYALURONIC ACID, EXTRACTS OF BEARBERRY (ARBUTIN), BAMBOO, GREEN TEA, MARGAT, CHESTNUT, MOSCHATA ROSE OIL, CORN OIL, MACADAMIA OIL, AVOCADO OIL, SHEA BUTTER, ALANTOIN, BEESWAX AND VITAMINS A, E, H, B₅, B

Indications

- ◆ all skin types, including sensitive skin
- ◆ natural ageing and photo-ageing
- ◆ skin flabbing, lack of elasticity, roughness
- ◆ mimic and age wrinkles
- ◆ loss of natural color of the skin
- ◆ skin around the eyes: dark circles, drooping of the upper eyelids, wrinkles like "crow's feet"

Effects

- ◆ strengthened cohesion and skin density
- ◆ increased elasticity and springiness
- ◆ visible reduction of mimic and age wrinkles
- ◆ improvement of face contours
- ◆ skin tone brightening
- ◆ correction of skin around the eyes 3 in 1: drooping upper eyelid reconstruction, reduction of wrinkles, brightening of dark circles under the eyes

INSTRUMENTAL METHOD

- ◆ PDT LASER LLLT/LED R 650 nm
- ◆ sonophoresis

TREATMENT FREQUENCY

- ◆ 4 - 6 treatment sessions in a series, once per week
- ◆ or as an individual treatment

TREATMENT TIME

- ◆ 80 minutes
